

## Windows Live Mail E-mail Setup

See page 3 to **troubleshoot** an existing account.

1. Open Windows Live Mail.
2. On the left side under Outbox, click “Add e-mail account” to add a new account.

3. Enter the E-mail address, password and display name. Make sure the box in front of “Remember Password” and “Manually configure server settings for e-mail account” is checked.

A screenshot of the "Add an E-mail Account" dialog box. The title bar is blue with the text "Add an E-mail Account" and a close button. The main area is light beige. It contains the following fields and options:

- Text: "Please enter your e-mail account information below:"
- Field: "E-mail address:" with the value "jdoe@cell1net.net". Below it, "example555@hotmail.com" and a link "Get a free e-mail account".
- Field: "Password:" with masked characters "•••••".
- Checkbox:  "Remember password"
- Text: "How should your name appear in e-mail sent from this account?"
- Field: "Display Name:" with the value "John Doe". Below it, "For example: John Smith".
- Checkbox:  "Manually configure server settings for e-mail account".

At the bottom, there are three buttons: "< Back", "Next >", and "Cancel".

4. Select “POP3” for the incoming e-mail server type. Enter “mail.cell1net.net” for both the incoming and outgoing servers. Make sure to check the box in front of “Outgoing server requires authentication”. Click “next” after entering in the information.

**Add an E-mail Account**

[Where can I find my e-mail server information?](#)

Incoming Server Information

My incoming mail server is a **POP3** server.

Incoming server:  Port:

This server requires a secure connection (SSL)

Log on using:

Login ID (if different from e-mail address):

Outgoing Server Information

Outgoing server:  Port:

This server requires a secure connection (SSL)

My outgoing server requires authentication

< Back   Next >   Cancel

5. Your e-mail setup is now complete. Windows Live Mail will now connect to check for any messages. The following page will help you troubleshoot if you come across any errors.

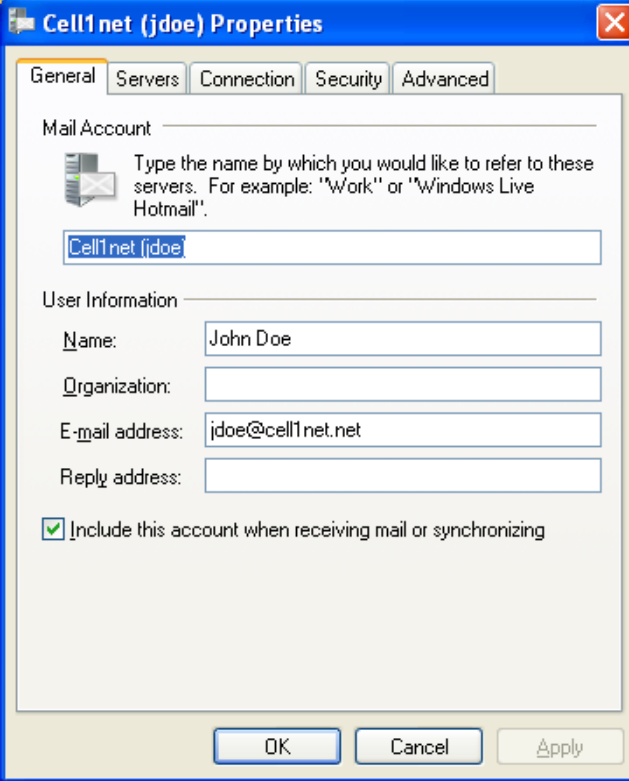

**Your new account settings are complete**

You have successfully entered in the information required to set up your account.

< Back   Finish   Cancel

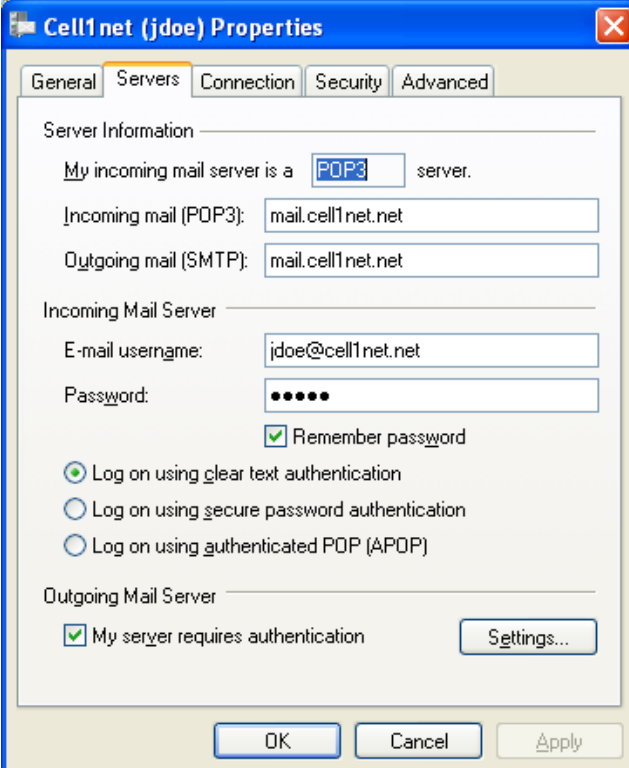

## Troubleshooting E-mail Settings

1. Right click on the account Cell1net on the right side of the screen, and choose properties.
2. On the “General” tab, make sure that everything is configured as shown below.

The screenshot shows the 'Cell1 net (jdoe) Properties' dialog box with the 'General' tab selected. The 'Mail Account' field is set to 'Cell1 net (jdoe)'. The 'User Information' section includes 'Name: John Doe', 'Organization: ', 'E-mail address: jdoe@cell1net.net', and 'Reply address: '. A checkbox labeled 'Include this account when receiving mail or synchronizing' is checked. At the bottom are 'OK', 'Cancel', and 'Apply' buttons.

3. Click on the “Servers” tab. Make sure everything is configured as shown below. Click “Ok” when you are done checking.

The screenshot shows the 'Cell1 net (jdoe) Properties' dialog box with the 'Servers' tab selected. The 'Server Information' section shows 'My incoming mail server is a POP3 server.' The 'Incoming mail (POP3):' field is 'mail.cell1net.net' and the 'Outgoing mail (SMTP):' field is 'mail.cell1net.net'. The 'Incoming Mail Server' section includes 'E-mail username: jdoe@cell1net.net', 'Password: ' (masked with dots), and a checked 'Remember password' checkbox. There are three radio button options for authentication: 'Log on using clear text authentication' (selected), 'Log on using secure password authentication', and 'Log on using authenticated POP (APOP)'. The 'Outgoing Mail Server' section has a checked 'My server requires authentication' checkbox and a 'Settings...' button. At the bottom are 'OK', 'Cancel', and 'Apply' buttons.
